

# Welcome to Blue Button

Blue Button makes your health information accessible and easy to understand.

The home screen provides a view into a patient's most critical information such as recent problem areas, allergies, plan of care and current medications.

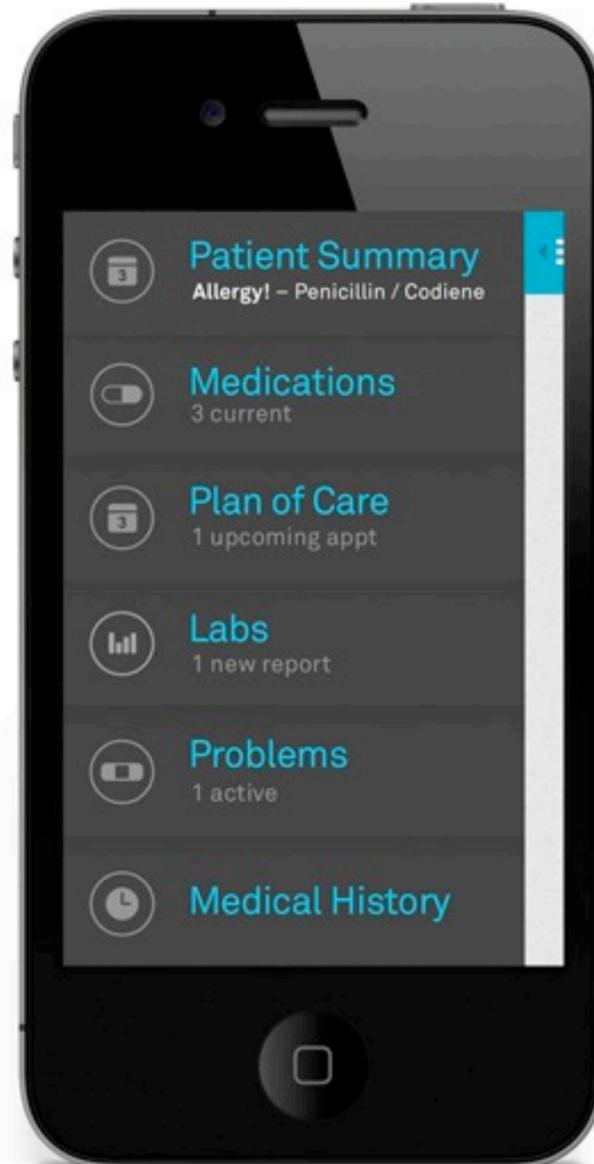

## Overview

Blue Button gives patients anywhere access to their medical record as shown here in the mobile version.

Patient Summary (Home)  
*Critical informaton such as allergies, current medication, and emergency contacts.*

Main menu  
*Also includes list of other family member profiles.*

Labs  
*Most recent lab is open to summary view.*

Medical History  
*History of patient's encounters, procedures, and immunizations.*

## Patient Summary (Home)

Provides an overview of critical patient information such as basic demographic data, allergies, problem areas and current medications.

Patient Summary (Home)

Patient Summary  
(scrolled to Problem Areas).

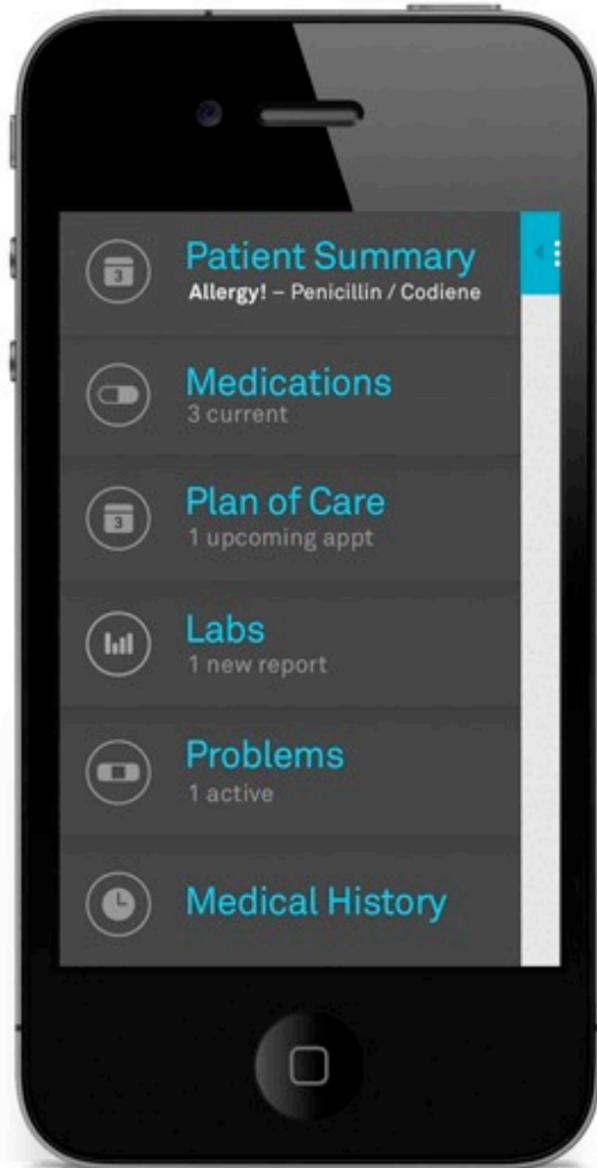

Patient Summary  
(scrolled to Current Medications).

Labs  
Summary view scrolled.

## Lab Results (Landing)

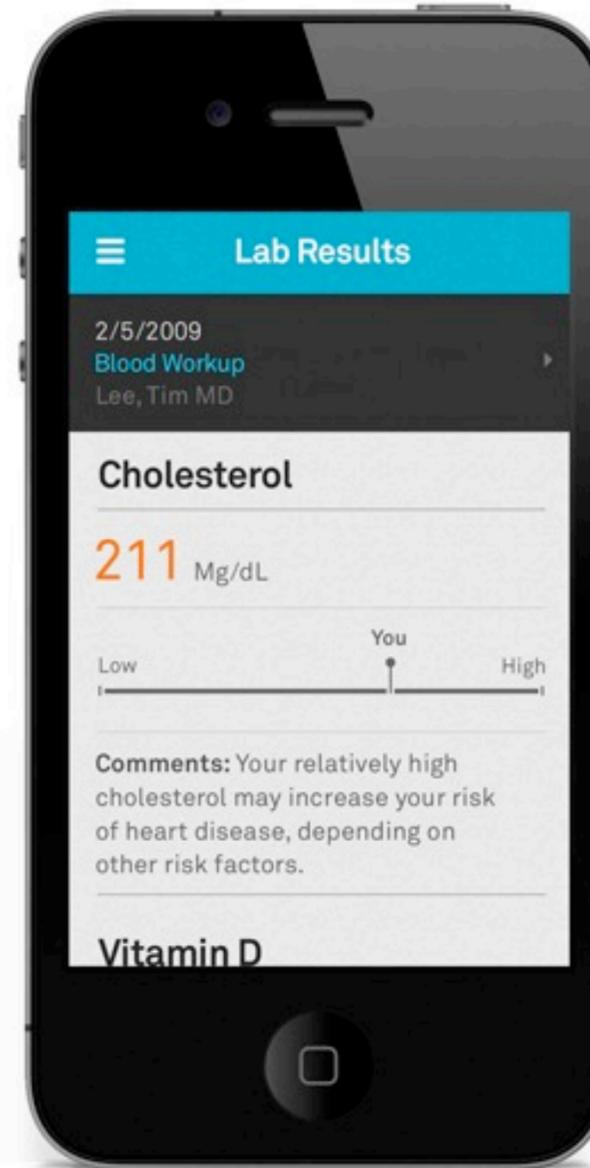

Lab results are listed in order date received with the most recent open to a summary view. The summary gives the patient a quick overview of their results in easy to understand terms.

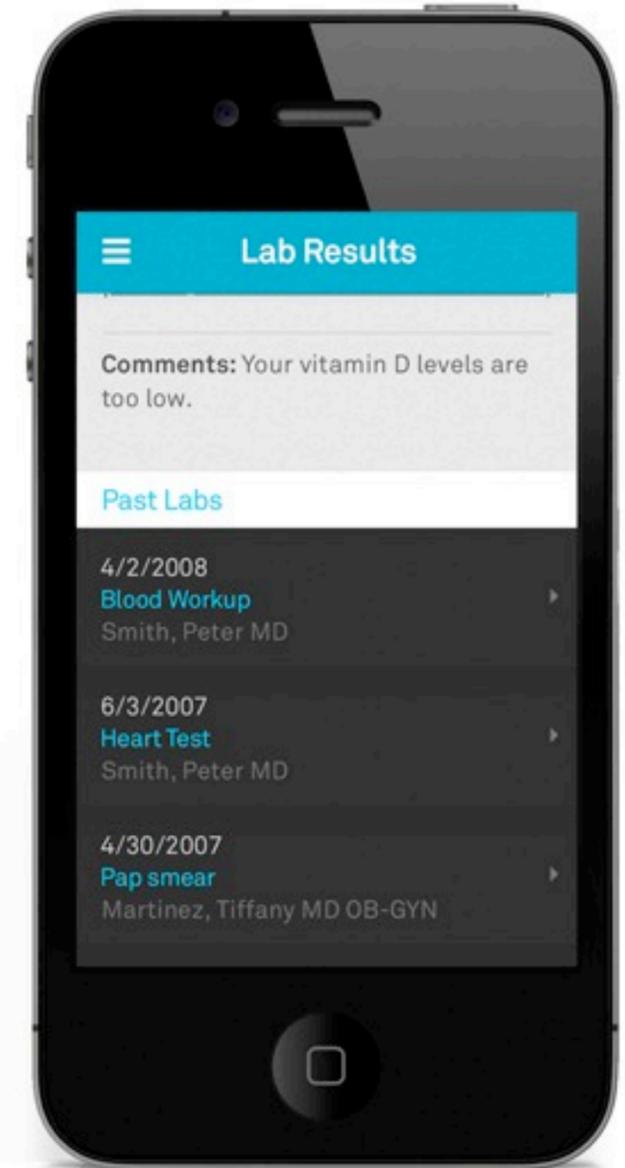

Main Menu  
User taps on Labs

Lab Reports  
Most recent report is automatically expanded to show summary.

Lab Reports  
(scrolled) Past reports are listed below.

Lab Reports  
(scrolled) Past reports are listed below most recent. Tapping expands to summary.

## Detailed Lab Results

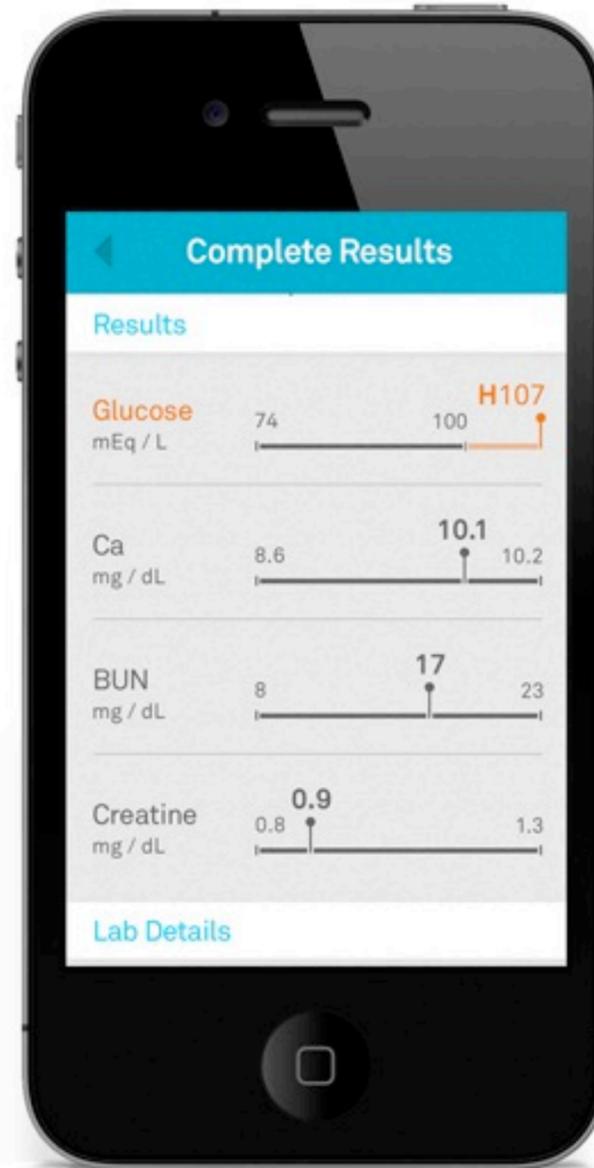

Lab results are summarized in clear, understandable language on the Labs landing section. The detailed lab report is also accessible for patients who want the full view.

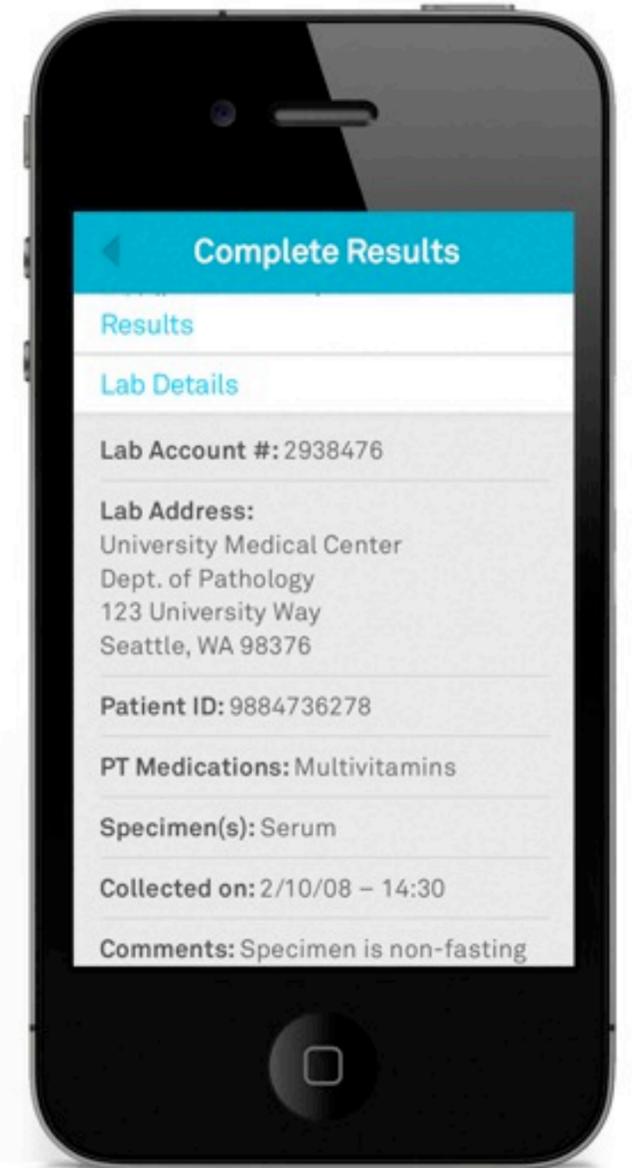

Labs  
Summary view

Lab Report  
Detailed view of full lab  
report data.

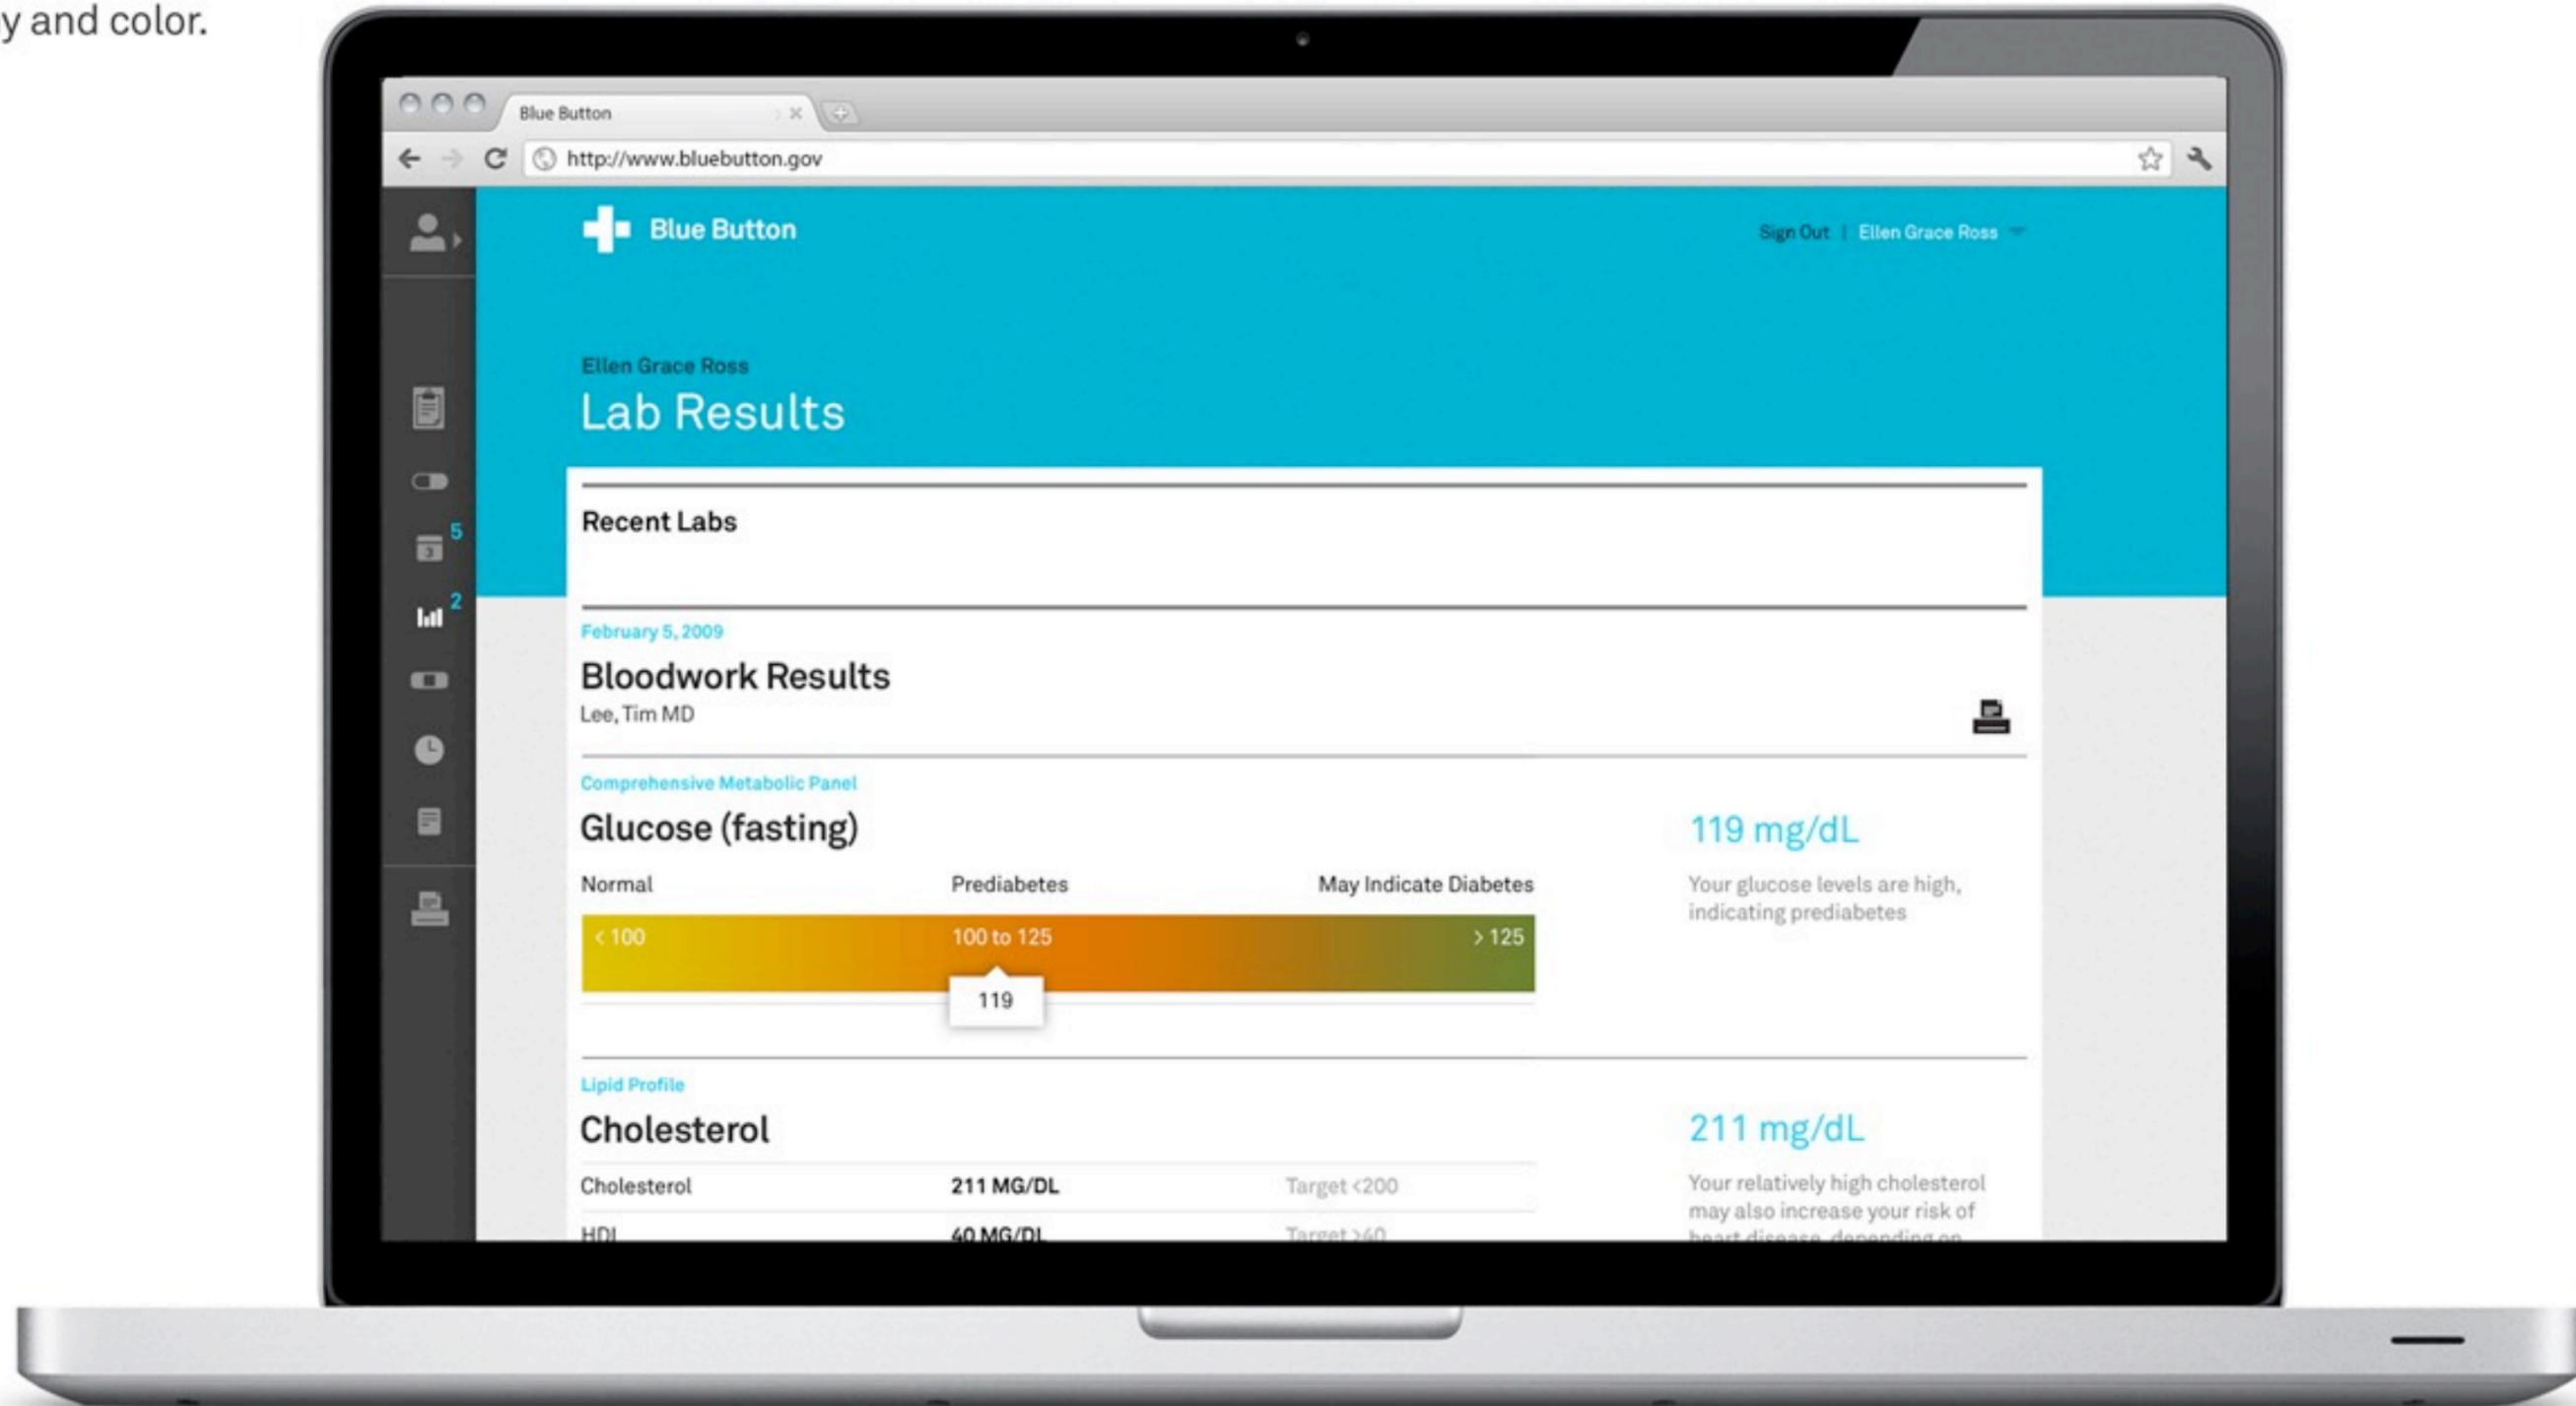

Lab Report  
Detailed view (scrolled).

Lab Report  
Detailed view (scrolled).

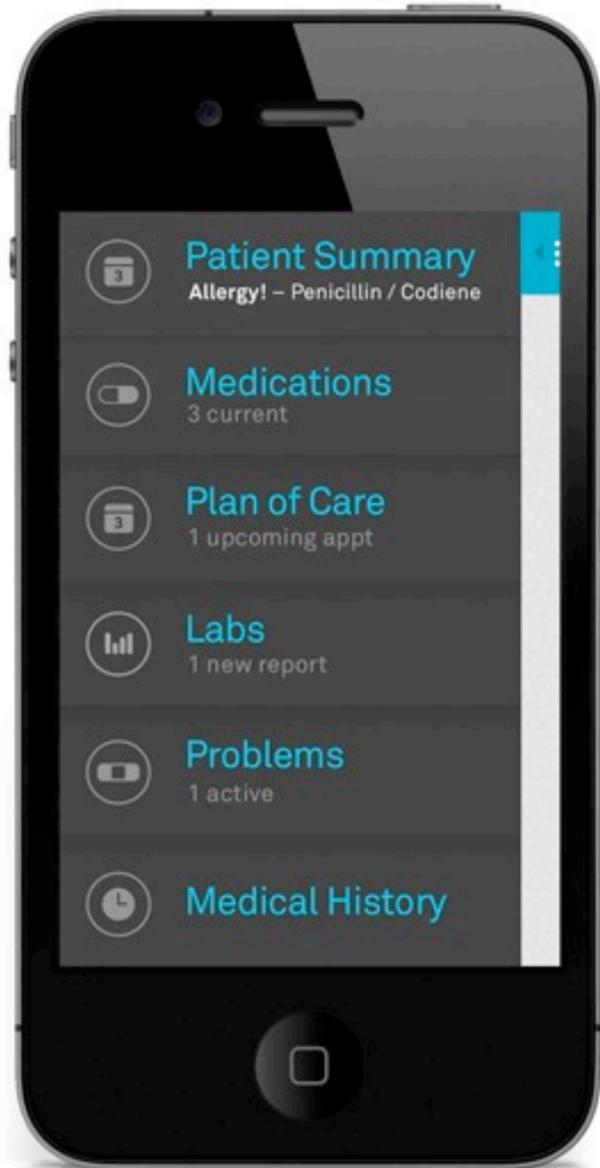

## Lab Results (PC)

When accessed from the web, lab results are visualized for better understanding and context using clear, simple typography and color.

# Medical History

Medical history information is organized chronologically and includes past encounters, procedures, and immunizations.

Main Menu  
User taps on Medical History.

Medical History

Medical History  
(scrolled)

Medical History  
(scrolled)

## Medical History Timeline

Turning the device horizontal converts the medical history into a timeline view. Tapping a dot opens a detail view of the record item.

Medical history  
*Vertical state*

Medical history  
*Horizontal state*

Medical history  
*Item detail overlay*

## Pocket Guide

The print icon creates a printable letter-sized PDF that can be folded into a small credit card sized booklet. It contains essential patient information such as current medications, allergies, emergency contacts, plan of care and most recent medical history.
